

About Us

RIGUAL was established in 1957 and started its life producing agricultural machinery. Over the years, the company has extended its product range into new Divisions that supply vehicles for Environment care and transport of Energy products.

During our history we have always had a long term focus, typical of so many family companies, investing in the sustainable development of our Company.

This policy of constant investment has allowed us to diversify and obtain a solid position in all the sectors where we operate.

Our main goal is to supply to our customers the solutions that are right to meet their needs.

We are always investing in the new designs, machinery and manufacturing processes that allows us to provide our customers the vehicles and machines that will make them work with higher efficiency.

Our competitive advantage is working at the side of our customers fully understanding their needs and supplying the products that they truly need.
