

About Us

Arados FONTÁN, is a company with a wide and proven experience in the manufacture of ploughs.

Since decades, we offer our customers and distributors specialized technical advice on the purchase of plough offering the product that best suits their needs.

From our beginnings in 1962 to the present we have been developing solutions for tractors medium and high power. 60 years after our first plough, We show you the series 5200 more modern, more efficient, more profitable and with the same philosophy of life.

We work with the latest developments in agro-industrial engineering to manufacture Plows with the highest performance, in order to improve the work of our final customers, farmers and cattlemen.
