

## About Us

Since being founded in 1956 as an agricultural machinery repair shop, it has continually adapted to the needs arising within the sector. Today, it has accrued wide-ranging experience in the design, manufacture and commercialisation of front loaders and implements for arable and livestock farming.

This experience, alongside all departments in the company having the most cutting edge machinery and technological means on the market, ensures that its products have an excellent reputation in over 50 countries around the world.

Over 50 years in the sector is the most significant endorsement guaranteeing and ensuring quality from this company, a company that has always enjoyed complete confidence among its clients.
