

## About Us

Our mission is to offer healthy solutions that provide our clients with safety, savings, competitiveness and improvements in their production processes.

We have central offices, located within the city where we manage the commercial and administrative part.

The part of production, engineering, warehouse is carried out in our facilities located in the Plaza industrial estate, just 10 minutes away.

We have more than 10,000 m2, where we make assemblies of the equipment, quality department, warehouse, as well as the technical part, engineering, testing and development.

Our high performance electrostatic spraying equipment integrates different techniques that allow us to achieve the best results.

We develop equipment that can be adapted to the different needs of our clients.
