

# About Us

ESTUPIÑA S.L. Since its foundation in the early 1960s, it has always been concerned with constant dedication to technological innovation, quality and customer service.

50 years of experience in the agricultural sector is the most important endorsement that gives credibility to this family business that has always had the trust of its customers.

In our facilities at the Polígono Las Horcas, warehouses 1-2-3 in Alcañiz (Teruel) we have more than 8,000 m2 in which we develop the complete process of research, design, production, assembly and marketing of our products, incorporating the latest technologies.

At ESTUPIÑA SL we design and manufacture mechanized harvesting equipment, a wide range of vibrators, umbrellas / fans and latest generation telescopic arms, coupled to a tractor or self-propelled machine and designed

to adapt to any type of plantation, allowing a profitable harvest of olives, almonds, pistachios, walnuts, stone pines, industrial apple ...

This commitment to innovation has led us, since our inception, to be pioneers in the design and manufacture of peelers / skimmers for almonds, pistachios.

The priority objective of ESTUPIÑA S.L. is to improve the quality of our products and services, and we also strive every day to adapt to the changing demands of the client and the market.
