

About Us

Agarín S. L. designs and develops high quality agricultural machinery with excellent results. It's reduced maintenance costs and long engine life makes Agarín's machinery a secure investment. From our facilities in Almudevar we distribute our products worldwide increasing our clients daily in the world's leading agricultural production countries.

Agarín S.L. designs and develops quality agricultural machinery. Our long history within the sector places us as one of the benchmark companies in the development of innovative systems and always designing machinery with the best materials and guarantees.

To guarantee a high performance of its equipment, Agarín S.L. develops innovative systems and designs machinery with the aim of advancing and implementing performance improvements.

Always focused on the objective of improving productivity to ensure the highest possible return on investment in agricultural machinery.

Durability and low maintenance are the main characteristics of its machinery, since it is robustly designed to maximize the life of its components and reduce wear and tear. The high quality of materials and components used give these machines a long service life and low maintenance costs.
