

## About Us

Since 2004, the Agricultural Technology Center, made up of private companies and public entities, has been covering various needs of the agricultural sector in the Cinco Villas region, throughout the Aragonese territory and in neighboring autonomous communities.

The main owner of the share capital of the Center comes from public funds represented by the Hon. City Council of the Villa de Ejea de los Caballeros and the Provincial Council of Zaragoza.

The rest of the capital is held by private companies in the agricultural sector of great significance in the agro-livestock sector.

Since its formation, our company has offered a quality and rigorous analysis service to our partners and clients in an agile and precise manner.
