

About Us

Agrotécnica Los Antonios is dedicated exclusively to the manufacture and distribution of agricultural machinery, specialising in earthmoving. Our network of distributors and technical service covers the whole of Spain.

The experience gained over more than 40 years of work has allowed us to have a broad outlook on the industry, making us fully aware of the needs of our customers and encouraging us to innovate with products so as to offer them new solutions. Our team of professionals, specialising in earthmoving and land levelling, is at your service.

Innovation, research and the development of new products has made us pioneers in the market at implementing state-of-the-art technology to machinery to optimise earthmoving and land levelling.

Agrotécnica Los Antonios has facilities covering an area of 5,000 m², divided into seven buildings that are perfectly equipped to manufacture and distribute agricultural machinery specialising in land levelling.

Facilities and resources with a single purpose: “To offer our customers the best machinery solutions for earthmoving and land levelling”.
