

About Us

BAGÜÉS is a company dedicated to the manufacture of agricultural machinery, with fifty years of experience in the sector. We are mainly specialized in land tillage machines, cultivator rollers, chisel, semi-chisel, harrows, cultivators, etc.

Although we are constantly introducing new machines in our range of products, in recent years the rakes that move the central stroke, we have incorporated more robust arms to the chisels and the strip-till is being introduced little by little, for tillage in fringes.

Always very attentive to the needs of the farmer and to the moment, in order to improve the product.

Products

StripTill

Swath rakes

Cultivating rollers

Chisel

Growers

Mowers

Agricultural rollers

Quick harrow

Precision fertilizers
