

About Us

Ferruz Industrial Group is a Spanish company present in the main international markets that have been working for more than 65 years aimed to satisfy the needs of manufacturers and professionals in the industry, transport or the environment.

With sustainability as a premise, high specialization and constant investments in research, development, and innovation, Ferruz Industrial Group, a leader in the manufacture of cylinders and hydraulic components, axles, and suspensions for agricultural and industrial machinery. Aluminum chassis and semi-trailers and urban solid waste collection trucks with lateral load are manufactured in our facilities.

Its activity is concentrated in two modern production centres located in Zaragoza, which also includes the assembly of complete wheels for machinery and the commercialization of the main brands for agricultural, industrial and truck tires.

The equipment and components produced by Ferruz Industrial Group operate machines and vehicles every day with maximum efficiency worldwide.
