

About Us

The Bondioli & Pavesi company, founded in 1950, leads the energy transmission market thanks to a group made up of eleven production companies, located in Italy and around the world. In 1976 the Bondioli & Pavesi group decided to settle in the Iberian Peninsula and created its subsidiary, BONDOLI Y PAVESI IBÉRICA S.A. Located in Zaragoza, an important industrial and logistical enclave of the Iberian Peninsula.

In the beginning, only self-made mechanical products were marketed (cardan transmissions and gearboxes), in the 80s the range was expanded with oleodynamic products also of its own manufacture (piston and gear pumps and motors, exchangers of heat and hydraulic distributors).

Subsequently, new commercialized products were incorporated that completed the product range and allowed us to provide a better and more complete service to customers.

Currently Bondioli and Pavesi Ibérica S.A. It has modern facilities with 2,400 m². It has a production section where practically all the transmissions sold in the market it serves are assembled, which allows for great flexibility and speed in deliveries.

In addition, an after-sales service is given to all products sold, having specific test benches for each product that allow their repair and testing with full guarantee, as well as the transformation and adaptation of products to customer needs.

Products

Annovi Reverberi (Membrane Pumps)

Battioni & Pagani Pompe (Agricultural and industrial vacuum pumps)

Faroil (Hydraulic cylinders)

Giovanni Fieni

(Air Spray Equipment)

HT (Orbital Motors)

Metaltecnica (Accessories for tanks)

MC Elettronica (Electronic control systems)

Sofima (Hydraulic Filters)
