

## About Us

Fersa Bearings is a Spanish multinational company devoted to the design, development, manufacture and distribution of high-quality complete bearing solutions for the automotive market. We have over 50 years of industry expertise and –since 2016- we are part of Fersa Group together with the Austrian industrial bearing manufacturer, NKE.

Our team always works towards excellence both in our products and our services. We are loyal to our company philosophy, becoming a flexible, agile and dynamic company, focused on the needs of an ever-changing market. Our main goal is the customer which leads us to create specific solutions, adapted to their requirements.

A small green square icon containing a white gear symbol, located in the top right corner of the light green text box.

We firmly believe in investments in innovation, technology and team talent as an engine of growth. This way of thinking has helped us grow day by day, becoming one of the benchmark brands due to the quality of our product and high standard of our service. We are completely committed to the process of continuous improvement, both in terms of our products, processes and organization wherever we are.
